Section 1 - Basic Instructions

1.1 X12 and HIPAA Compliance Checking, and Business Edits

EDI interchanges submitted to Empire for processing pass through compliance edits. 5010 acknowledgments and reports for accepted/rejected files will be placed in the submitter's trading partner mailbox for pickup. *EDI Representative will review these reports thoroughly with submitters.

- TA1 Interchange Acknowledgment. Empire returns TA1 X12 and proprietary reports to the submitter of inbound 837 files containing envelope errors in the ISA and GS segments.
- Level 1. Empire returns a 999 Interchange Acknowledgment to the submitter for every inbound 837 transaction received. Each transaction passes through edits to ensure that it is X12 compliant. If the X12 syntax or any other aspect of the 837 is not X12 compliant, the 999 will also report the Level 1 errors in AK segments and indicate that the entire transaction set has been rejected.
- Level 2. In addition to HIPAA TR3 edits, Empire applies business edits, such as member validation to each 837 transaction. These business edits ensure that the necessary information is populated and complete for efficient processing. When encountering HIPAA compliance (including balancing), code set or business errors, Empire returns: 1) 277 Claims Acknowledgement (CA) and 2) 864 Level 2 Status Report to the submitter identifying which claim(s) have failed.

1.2 HIPAA Compliant Codes

Use HIPAA-compliant codes from current versions of the following:

- Physician's Current Procedure Terminology (CPT)
- Health Care Financing Administration Common Procedural Coding System (HCPCS)
- International Classification of Diseases Clinical Mod (ICD-9-CM) Diseases
- Provider Taxonomy Codes
- National Drug Code

*ICD-10 Codes will not be accepted any earlier than October 1, 2015.

1.3 Diagnosis Codes

According to the 837P TR3, a transaction is not X12 compliant if decimal points are used in diagnosis codes. Therefore, should a diagnosis code contain a decimal point, Empire will return a 999 to the submitter indicating that the transaction has been rejected.

1.4 Procedure Codes and Modifiers

All valid CPT and HCPCS codes and modifiers are accepted for encounter adjudication. Refer to your billing guidelines or provider contract for submission of these codes. If submitted codes are invalid, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.5 Uppercase Letters, Special Characters, and Delimiters

As specified in the TR3, the basic character set includes uppercase letters, digits, space, and other special characters.

- All alpha characters must be submitted in UPPERCASE letters only.

- Suggested delimiters for the transaction are assigned as part of the trading partner set up. EDI Representative will discuss options with trading partners, if applicable.

Inbound Delimiters		
	Suggested Value	
Data Element Separator	*	Asterisk
Sub-Element Separator	:	Colon
Segment Terminator	~	Tilde
Repetition Separator	^	Caret

- To avoid syntax errors, hyphens, parentheses and spaces are not recommended to be used in values for identifiers.

Examples: Recommended: Zip Code 123456789 Medical Record # 1234567

- Since originally submitted values may be returned on outbound transactions, Empire encourages trading partners to not use the following special characters as part of the value: asterisk (*), less than/greater than signs (<, >), colon (:), and slash (/). This minimizes the risk for a special character to be recognized as a delimiter.

Example: Provider assigns a Patient Control Number '12*3456789'. Although an asterisk (*) is a valid special character, it adversely affects processing since it is also a common delimiter. The value '12*3456789' may process incorrectly as two separate values '12' and '3456789'.

1.6 Decimal "R" Data Element Types

"R" data element types contain a decimal point; involving monetary amounts, units, visits, weights, and frequency. Empire recommends using decimal points for monetary amounts, and whole numbers for other types of "R" data elements. Except for monetary amounts, if "R" data element type includes a decimal and numbers after the decimal, Empire adjudicates the claim based on the whole number. Numbers after the decimal will not be considered.

1.7 Numeric Values, Monetary Amounts and Units

- Empire pays all claims in US dollars and therefore, accepts monetary amounts in US dollars only. If codes related to foreign currencies are used, then a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.
- Empire recognizes units in whole numbers only.
- Empire recognizes units in values of less than 9999 and greater than or equal to zero.
- If a negative service line charge (SV102) or negative units (SV104) are used, then a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.8 Address Information

- P.O. mailboxes / Lock Boxes are not allowed in the Billing Provider loop. If submitted in the Billing Provider loop, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.
- The Pay-to Address loop does support P.O. Box / Lock Box addresses. Therefore, if payment is expected to be remitted to a P.O. Box / Lock Box, submit the P.O. Box / Lock Box address.
- Full 9-digit zip codes are required in the Billing Provider and Service Facility Location loops. If 5-digit zip codes are used in these loops, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.9 Sending Unsolicited Attachments to Support an Encounter

Loop 2300 PWK segment is required when paper documentation (attachments) supports an encounter.

In order to expedite processing of an encounter:

- Mail the attachment the same day the encounter is submitted
- Do not send a copy of the encounter with the attachment
- Do not send unnecessary attachments (i.e., do not send a copy of the member's ID card)
- Include the attachment control # in the upper right hand corner of the supporting documentation

Mailing Address for FEP -

Federal Employee Program
PO Box 3876
Church Street Station
New York, NY 10008

1.10 Taxonomy Codes (PRV)

The Healthcare Provider Taxonomy code set divides health care providers into hierarchical groupings by type, classification, and specialization, and assigns a code to each grouping. The Taxonomy consists of two parts: individuals (e.g., physicians) and non-individuals (e.g., ambulatory health care facilities). All codes are 10-alphanumeric positions in length. Health care providers select the taxonomy code(s) that most closely represents their education, license, or certification. If a health care provider has more than one taxonomy code associated with it, a health plan may prefer that the health care provider use one over another when submitting claims for certain services.

It is strongly recommended that the taxonomy be populated in PRV segments for all applicable claims that you are filing. Refer to the CMS website for a listing of codes, www.wpc-edi.com/taxonomy.

Section 2 - Enveloping

EDI envelopes control and track communications between you and Empire. One envelope may contain many transaction sets grouped into the following:

- Interchange Control Header (ISA)
- Functional Group Header (GS)
- Functional Group Trailer (GE)
- Interchange Control Trailer (IEA)

837 Professional Health Care Claim–Envelope Specific to Empire NY (Encounter) (TR3, Appendix C)							
ISA—Interchange Control Header		GS—Functional Group Header		GE—Functional Group Trailer		IEA—Interchange Control Trailer
